Status of the Claims

1. Claims 1-20 are pending in this application.

Election/Restrictions

2. Restriction to one of the following inventions is required (35 U.S.C. 121)
 - I. Claims **1-11** for a subject matter of a network computer system having an interchange party computer system (IPCS), comprising information selector, a user interface, a database, a controller/a determine means, a receiving means, and a returning means for matching, classified in class 705, subclasses 21-22.
 - II. Claims **12-20** are drawn to a method carried out through an interchange party computer system (IPCS), using an Automatic Bill Payment Module, classified in class **705**, subclasses 39-40.

The 2 above inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as system and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different system or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the claimed method (12-20) can be performed manually, i.e., by hand/brain and human-being actions/decisions.
